No: 101/1

Report on the test of applicator "Mediv" on patients of a therapeutic and neurological profile.

180610, Kronstadt, Military unit.

Applicator "Mediv" represents biologically active complex of substances of a vegetative and animal origin.

Applicator-composite of medical products "Mediv" of batch production have the Federal license, the certificate of conformity, and is included in the State register of products of medical assignment.

Application of "Mediv" in complex therapy in regenerative period of patients with diseases of the central and peripheral nervous system, the muscle-skeletal system, chronic diseases of broncho-lung system, gastro-enteric path has allowed to reduce reception of medical products. Normalization of sleep and of mood background was observed practically at all patients. The questioning carried out for subjective judgment of the state of health has established that no any case of deterioration of a condition was noted.

Applicator is convenient in operation, economical, does not demand long training of the personnel, what makes it an attractive means of reflex therapy in the regenerative period of patients of various profile.
